Summary

I am an ambitious and energetic student, who commits a lot of his time, learning new upcoming technologies. I have studied in numerous fields of coding including web and mobile development, microcontroller hardware, and game development. As a high school student, I was introduced to mobile application development which grabbed my interest instantly and I've been dedicated to exploring this vast field ever since. In my free time, I like to learn new things, read books and travel. Besides studying for the university, I'm learning to develop Web and Mobile applications.

Work experience

Software Engineer   May 2021 - Present

Telekom Slovenije

Part time development of a cross-platform Flutter NEO mobile application.

Software Engineer   Aug 2020 - Oct 2020

Geological Survey of Slovenia

I developed a content management system for the analysis of harvested data using Django, PostgreSQL, JavaScript, and HTML5/CSS.

Education

Master's degree, Multimedia   October 2022 - Present

Faculty of Computer and Information Science Ljubljana

Bachelor's degree, Computer and Information October 2018 - June 2022
Sciences

Faculty of Computer and Information Science Ljubljana

Emphasis on superlative technical knowledge and acquisition of fundamental theoretical as well as practical knowledge in the field of computer and information science.

- Programming languages: Java, Javascript, Python, PHP, C & R
- SQL
- Web development
- Android app development
- ARM microcontroller development
- Linux
- Docker
- Kubernetes
- Software testing & quality
- User interfaces
- Artificial intelligence
- Algorithms and data structures
- Computer communications
- Operating systems
- Graphic design
- Communication protocols and network security
- Computer graphics
- Statistics
- System software
- Software engineering
- Information systems
- Game technology and virtual reality
- Electronic and mobile business

Skills

Node.js

Flutter

JavaScript

Python

Dart

Django

Java

SQL

Docker

Bash

Git

Vue.js

PHP

Laravel

.NET Core

High School Diploma, Computer Science   September 2014 - June 2018

Electrotechnical and Computer School Nova Gorica

A computer technician knows the basic elements of software, rules for writing programs and basic knowledge of syntax and semantics in writing programs, and is also qualified to manage information equipment.

- Programing languages: Java, Javascript & PHP
- HTML & CSS
- Oracle SQL & MySQL
- Oracle Forms
- Web development
- Android app development
- Hardware & Software management
- Motorola microcontroller development
- Linux & Windows server management
- Powershell
- Computer communications
- Electrical knowledge
